ANDRE ADVANCED KIT

Advanced Near-Field Detection Receiver

- ① ANDRE - unit, wall charger, int'l adapter, and USB
- ② RF Coax Antenna/Probe Connector Cable
- ③ Concealed Antenna
- ④ Log Periodic Antenna
- ⑤ Acoustic Leakage Detector
- ⑥ 8 Clip Breakout Cable
- ⑦ VLF Loop
- ⑧ Locator Probe
- ⑨ Whip/Dipole Antenna
- ⑩ Lithium-Ion Batteries (4) and Charger
- ⑪ Carrier Current Probe - unit and int'l adapter
- ⑫ Audio Transformer
- ⑬ Neck and Wrist Lanyards
- ⑭ Headphones
- ⑮ Audio Transformer Cables

PRODUCT SUPPORT AND SALES ENQUIRIES

For support information visit www.intpro.com or email sales@intpro.com. Our team provides phone support Monday through Friday, 8:00 a.m. until 4:00 p.m. (GMT).

REI TRAINING

REI offers the largest commercially available technical security training facility in the world. Experience hands-on training by REI instructors on state-of-the-art equipment. *For details contact info@intpro.com or call +44 (0) 20 72583771*

ANDRE FILE CAPTURE

Gather data throughout an investigation for further analysis following a sweep. Review time chart screenshots, playback demodulated audio, and download captured signal lists on any PC.

118 Piccadilly, Mayfair, London, W1J 7NW • TEL +44 (0) 20 7258 3771

REI SECURITY EQUIPMENT

OSCOR™

TSCM Spectrum Analyzer

- Scans 24 GHz per second
- Built-in auto switching antenna system
- Portable - weighs 9.6 lbs/4.4 kg
- Patented trace analysis software
- Quickly detects electronic surveillance devices

DETECT TRANSMITTING DEVICES

ANDRE™

Near-field Detection Receiver

- Receives transmissions from 1 kHz - 6 GHz
- Signal strength histogram display with user-selected time intervals
- Lightweight, handheld unit
- Auto-generated signal lists
- Live analog audio demodulation

DETECT HIDDEN ELECTRONICS

ORION™

Non-Linear Junction Detector

- Wide bandwidth transmit signal
- Line of sight antenna mounted display
- Lightweight, compact design
- Detects even turned off electronics

DETECT TELEPHONE WIRE TAPS

TALAN™

Telephone & Line Analyzer

- Tests digital and analog phones and lines
- Detects taps attached to line
- Digital demodulation, FDR, NLJD, DMM, O-scope, automatic switching matrix
- VoIP testing capabilities
- Most sophisticated phone analyzer in the world

TECHNICAL SECURITY TRAINING

IPS through REI offers the largest commercially available technical security training facility in the world with classes taught regularly. Students receive classroom training and hands-on exercises in "live" project rooms using the newest technology in information protection equipment. The training center offers a complete curriculum for the beginner or advanced technician. Custom courses are also available at your location. For more information visit www.intpro.com
